

## **STS Robot Rebuild Program**

STS has the ability to rebuild AMAT P5000 robots and other subassemblies

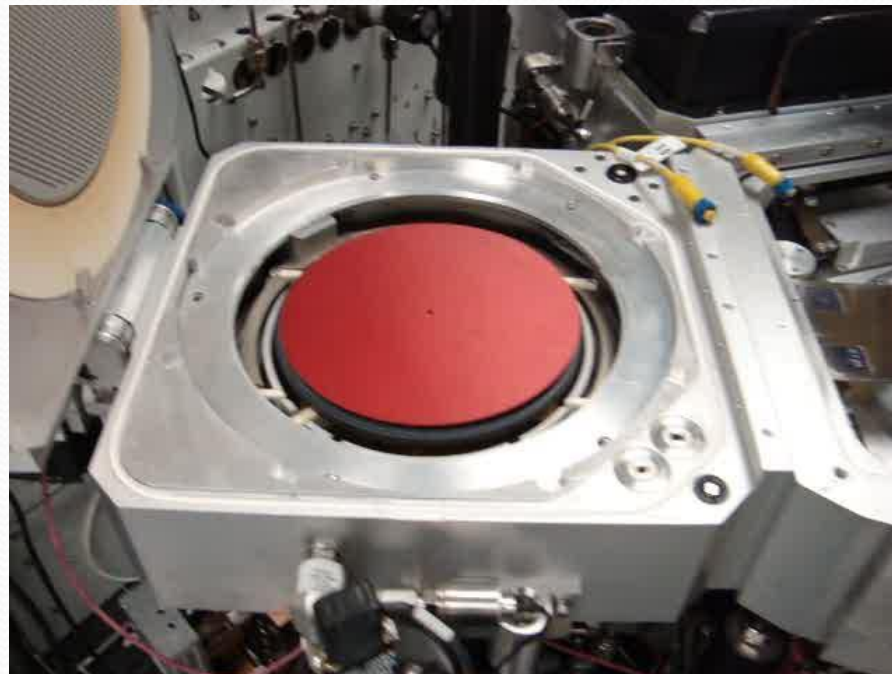

## Tear down and Rebuild

STS does a complete tear down of the robot and rebuilds replacing all consumables

## Robot Testing

The robot is tested for mechanical and vacuum integrity in P5000 test mainframe

## Documentation and Shipping

STS documents the rebuild with information including problem analysis, repair, and testing and calibration data. This information will be included with your robot and shipped in a protective case.
